Randy J. Bator CISSP, CISM, CISA, CIPP/G

CEO/Principal

After working over 20 years supporting Federal and state agencies in National Security issues and Information Technology challenges Randy developed a passion for desiring to enable organizations the ability to leverage holistic Information Assurance and IT engineering services and decided to establish Security 360 LLC in 2012. By doing so, Randy knew he could provide superior professional Information Assurance and Engineering services that are delivered with expertise, efficiency and quality.

His areas of concentration are in Information Assurance, Secure Application Development, Privacy, Governance/Regulatory/Compliance, Secure Network Architecture, Continuity of Operations, Service Oriented Architecture (SOA) Security, Cloud and Virtualization Security and Risk Management. He has extensive experience in the intelligence community, having served as an intelligence analyst for over 14 years. He also has taught courses and given presentations to professionals in other major industries.

Randy was successful in many Information Assurance support efforts for his customers over the years to include leadership roles and guidance in major FISMA efforts such as Security Accreditation and Authorizations (SA&A's), Information Technology Contingency Planning (ITCP), Continuous Monitoring (CONMON), Privacy Impact Assessments (PIA), Audit Plan development, and much more.

Randy established many of his core business values and leadership skills in a beneficial and active military career in which he supported various National Defense efforts. As an intelligence analyst with the National Security Agency (NSA) Randy developed and honed critical research and analytical skills which he continues to leverage in successful and complete Information Assurance services. Because of his caring attitude and Christian philosophy, Randy chooses to share his knowledge and experience with both other professionals and entrepreneurs, particularly in Information Assurance industry. He has taught courses for several community colleges, and he has been active in his local community.

He attributes his success to the encouragement and support of his family, his prior military experience, and a highly-respected mentor.

Randy enjoys spending time with his family and conducting industry research. He is an advocate for veteran causes.
